

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Anecdota Oxoniensia. Classical Series. Part VII. Collations from the Harleian MS of Cicero 2682, by ALBERT C. CLARK, M. A., Fellow of Queen's College, Oxford. With a Facsimile. Oxford, At the Clarendon Press, 1892.

This latest issue in the Classical Series of the valuable Anecdota Oxoniensia opens with a very clear collotype facsimile of a page of the Harleian MS 2682, giving §72–77 of Cicero's pro Milone. In the introduction the age and form of the MS are treated, and an interesting account is given of its history and of the collations previously attempted, most of them lamentably insufficient and misleading. The collation of Gulielmius is, however, defended against the unfavorable opinion of Halm. Graevius, who borrowed the MS in 1688 from the cathedral library at Cologne, and did not scruple to keep it until his death in 1703, styles it sometimes his *secundus*, and sometimes *Coloniensis*. The affinities of the MS are carefully examined, and it is shown to be especially valuable for the pro Milone and the de Imperio Cn. Pompei. E, an Erfurt MS of the XIIth century, is proved to be derived in part from the Harleian. Valuable readings from the latter are then cited and discussed for the following works: De Amic., De Senec., Cicero in Salustium, Sal. in Ciceronem, in Catilinam, pro Marcello, pro Ligario, pro rege Deiotaro, pro Milone —in which oration many glosses are shown to have crept into the text—and de Imperio, obviously copied from a very ancient original and containing many unique and important readings. Then follow collations of these works in the order above mentioned, and of in Verrem, Act. II, Lib. III, based on the text of Baiter and Halm's Orelli. No collation is given of the Epp. ad Fam., as the results of such a collation by Mr. Purser are printed in Prof. Tyrrell's edition of the Letters. If space permitted, interesting examples might be given of readings confirming or refuting the conjectures of scholars. The work certainly forms an important contribution to the critical apparatus of Cicero. M. W.
